PROFILE

Experienced and customer-focused software developer with 3 + years in .Net technologies. Proficient in Asp.net Core, MVC, JQuery, and SQL Server. Quick learner, excelling in independent tasks. Strong analytical and communication skills. Seeking a challenging role in application development to leverage expertise for organizational growth and success.

SUMMARY

- Over 3+ years of hands-on experience in IT, contributing to diverse projects across Development, Design, Implementation, Testing, and Maintenance phases. Proficient in ASP.NET Core, MVC, .NET Framework, C#, MS SQL Server, and Entity Framework, with strong expertise in backend development. Skilled in front-end development, creating dynamic web application interfaces using Bootstrap, HTML, CSS, JSON, and jQuery to ensure responsive and user-friendly designs. Solid understanding of Object-Oriented Programming (OOP), enabling the writing of clean, maintainable, and efficient code following best practices. Advanced SQL development skills, including writing complex SQL queries, stored procedures, functions, triggers, and working with cursors. Proficient in database management using SQL Server and MySQL. Experienced in all phases of the Software Development Life Cycle (SDLC), including Requirements Analysis, System Design, Development, Documentation, Testing, Deployment, Version Control, and Production Support. Proficient in using Git, GitHub, and Core FTP LE for version control and source code management, ensuring smooth collaboration in a team environment. Familiar with development and collaboration tools such as Visual Studio, SQL Server Management Studio (SSMS), Postman, Microsoft Word, Microsoft Excel, Zoho, Jira, and Teams. Successfully integrated third-party APIs into projects, demonstrating adaptability to new technologies and efficient collaboration within development teams. Highly motivated and customer-focused, with a strong commitment to applying analytical skills and technical expertise to contribute to organizational growth in web application development.

SKILLS

- C#
- Asp.Net
- Asp.Net
- ADO.NET
- Entity Framework
- HTML/CSS
- Bootstrap
- JQuery MS-SQL
- Server CURD
- operations
- Web API

WORK EXPERIENCE

Company Name : Nass Technologies Nagpur

Duration: Feb- 2023 to 2026 Role: Dot Net Developer

Project : Email Generation& Automation

Duration : Dec- 24 to 26 Responsibilities:

- Designed and developed an Email Automation system using the .NET API to manage and send transactional and notification emails across multiple domains.
- Implemented domain authentication using DKIM and DMARC to improve email trust, security, and inbox placement.
- Developed support for multiple SMTP providers, allowing users to send emails using their own SMTP credentials as well as third-party email services.

- Implemented secure SMTP configuration management, including validation and encryption of sensitive credentials.
- Created and optimized SQL Server stored procedures for managing email campaigns, SMTP configurations, domain authentication status, and email activity logs.
- Integrated Entity Framework for user authentication, login, and logout, ensuring secure session handling and role-based access control.
- Implemented email engagement tracking, including email open and link click tracking, to measure campaign performance and user interaction.
- Designed reporting logic for open and click analytics to provide actionable insights to users.
- Ensured application scalability and performance to handle high-volume email sending for multiple clients.
- Followed best practices for security, logging, and error handling to maintain system reliability.
- Used OpenAI GPT API to generate personalized and professional email content dynamically within the project.
- Integrated AI-powered email generation feature to automate outreach, improve response quality, and reduce manual drafting time.

Project : Future Inspire (Web API MLM Application)

Duration : July - 23 to Dec - 24 Responsibilities:

-
- Developed and optimized MLM Web API features using .NET Core, ensuring efficient handling of user, referral, commission, and product data with SQL Server stored procedures for data retrieval and manipulation.
 - Designed and implemented stored procedures for complex database operations like managing MLM referral structures, calculating commissions, and handling user transactions, ensuring scalability and performance as the user base grows.
 - Integrated Entity Framework Core to manage user authentication, role-based access control, and secure login/logout functionalities, ensuring secure session management and activity tracking across the application.
 - Implemented JWT-based authentication for secure access control, managing session expiration and token renewal processes to prevent unauthorized access and secure user data.
 - Troubleshoot and debugged issues, enhancing application stability and ensuring smooth functionality across all core modules such as referral tracking, commission calculations, and order management.
 - Kept up-to-date with advancements in .NET Core, Entity Framework, and SQL practices, continually improving the code quality and adding new features to meet evolving project requirements.
 - Collaborated with cross-functional teams, ensuring clear communication between front-end, back-end, and product teams to meet functional requirements and deliver the project on time.
 - Created comprehensive technical documentation for the system's architecture, including API endpoints, database models, and business logic, making the system easy to maintain, extend, and scale.
 - Wrote and maintained unit tests and integration tests, working closely with QA teams to ensure robust, error-free application functionality and improve testing coverage.
 - Managed version control with Git, ensuring smooth collaboration within the team, resolving conflicts, and maintaining a consistent development flow.
 - Assisted in the deployment of the MLM Web API, ensuring smooth integration and performance in production environments, and supporting post-deployment monitoring.
 - Followed coding best practices, maintaining high standards for code readability, consistency, and performance, ensuring the application could scale as needed.
 - Identified and solved technical challenges, ensuring timely resolution of issues like performance bottlenecks, security vulnerabilities, and data integrity.
 - Actively contributed to sprint planning and team meetings, helping define milestones, project goals, and ensuring alignment with deadlines for delivering functional MLM features.

HIGHEST QUALIFICATION

Bachelor of Computer Applications (BCA)

Sant Gadge Baba University, Amravati (2022)
